

```
global class DailyLeadProcessor implements Schedulable {
    global void execute(SchedulableContext ctx) {
        List<Lead> lList = [Select Id, LeadSource from Lead where LeadSource = null];

        if(!lList.isEmpty()) {
            for(Lead l: lList) {
                l.LeadSource = 'Dreamforce';
            }
            update lList;
        }
    }
}
```
